

Mahanthesh S

Software Engineer | Java Backend Developer

+91 7892568479 | Bengaluru, Karnataka, India 560064 | mahantheshs61@gmail.com

SUMMARY

Information Science & Engineering graduate with hands-on experience in Java, Spring Boot, RESTful API development, PostgreSQL, Hibernate/JPA, Spring Security and JWT authentication. Experienced in database optimization, API performance tuning, backend development and Agile software development, with a focus on building secure, scalable and maintainable applications.

EXPERIENCE

Customer Service Support Intern — Era Foundation Pvt. Ltd. | Bengaluru Jun 2026 – Present

- Resolved customer queries and supported issue resolution with a focus on accuracy, responsiveness and service quality.
- Investigated customer issues, documented findings and communicated clear resolutions to improve support workflows.
- Worked with internal teams to track customer concerns and support timely and accurate resolution of service requests.

Web Development Intern — Mindset IT Solution | Bengaluru Mar 2025 – Jun 2025

- Designed and developed scalable RESTful APIs using Spring Boot and layered architecture.
- Improved database query efficiency by approximately 20% using indexing and optimized joins.
- Implemented JWT-based authentication and role-based access control for secure application access.
- Integrated PostgreSQL using Hibernate/JPA with validation and exception handling.
- Assisted with deployment and testing of backend services on cloud platforms.

SKILLS

Programming Languages	Java, Python, SQL
Frameworks	Spring Boot, Spring Security, Hibernate/JPA, React
Backend & APIs	RESTful APIs, REST API Design, JWT Authentication, JDBC, Microservices, Exception Handling
Databases	PostgreSQL, MySQL
Tools & Platforms	Git, GitHub, GCP, Vercel, Render, OpenAPI, Postman, VS Code, Microsoft Excel/Office
Core Concepts	Data Structures & Algorithms, Object-Oriented Programming, Database Optimization, API Performance Tuning
Methodologies & Testing	Agile, SDLC, Manual Testing, Unit Testing

PROJECT

Novel Journey — Novel Reading Platform Feb 2026

Technologies: Spring Boot, React, REST APIs, Spring Security, JWT, PostgreSQL, JPA/Hibernate

- Implemented role-based access control using Spring Security and JWT authentication.
- Optimized database queries using indexing, pagination and custom JPA queries for improved performance.
- Improved API response time by approximately 30% through caching and query optimization.
- Designed workflow-based systems for chapter requests, approvals and scheduled deletions with transactional consistency.
- Identified and resolved API performance bottlenecks to improve response reliability.

CERTIFICATIONS

- Google Cloud Skill Badge – Prompt Design in Vertex AI
- Oracle SQL Certification – SQL Basics
- The SecOps Group – Certified Network Security Practitioner (CNSP)

EDUCATION

B.E., Information Science & Engineering — BMSIT&M; | 2021 – 2025
